AMENDMENTS TO THE SPECIFICATION

Please add the following new paragraph after the paragraph ending on line 7 of page 32 and

before the paragraph beginning on line 9 of page 32:

-- Embodiments of the invention may be implemented using a computer-usable

medium. Specifically, a computer-usable medium may have computer-readable program code

embodied therein for causing a computer system to perform the one or more of the embodiments

discussed above for controlling access to resources. --
